

Joy, IL May 2023 Council Report

Water System

Britton came to look at the communication issues with Well 2. They were able to fix a lot of the functionality problems with the VFD that we were having. However, the analog signal from the water plant was not making contact with the VFD. They believe they know the reason why, but it is going to take some digging through the schematic. I had them piggyback on an already planned to trip to Aledo to save some cost, I'm going to have them do that again when they come back the next time to get the rest of the wiring figured out.

I'll have the CCR ready by next week.

Wastewater System

Nothing of note for the wastewater system currently.
