

Joy, IL June 2023 Council Report

Water System

Everything has been working with Well 2. We are still getting some nuisance alarms, so we'll have Britton handle that next time they are in the area. Overall, we are running at full capacity, and everything is as it should be.

CCR has been sent to the clerk. I will get the certification to the EPA before July 10th.

We have officially changed labs to the Illinois EPA lab. We just had too many issues with Pace not doing a good job and causing compliance issues.

Wastewater System

The EPA did not approve the wastewater contract based on a simple box being checked that shouldn't have. We are resubmitting it and all should be fine.
