

## Joy, IL November 2023 Council Report

### Water System

We have some lead/copper samples to wrap up before the end of the year.

I've reached out to Britton for an official quote on the work at Well 2. It's fairly small work, so I'd like to get it wrapped up soon. I've been in communication with them but haven't seen an actual quote yet. As soon as I get that I'll forward it to council.

Other than that, the things are quite with the water system. We're going to make our usual seasonal adjustments to the water tower levels, but aside from that, nothing of note.

### Wastewater System

Nothing of note for the wastewater system.
